Automation QA Engineer

Employment Type

Full-time

Description

We are looking for a motivated and detail-oriented **Automation QA Engineer** with 1 to 3 years of hands-on experience in test automation. You will be responsible for designing, developing, and maintaining automated test scripts to ensure high-quality software delivery. As part of our growing QA team, you'll collaborate closely with developers, product managers, and other stakeholders to drive quality from early development through to release.

Job Location

Ahmedabad

Experience

- **1 – 3 years experience required**
- **Fluent in English Communication**
- Only IT Services experienced candidates
- **Looking for an Immediate Joiner**

Responsibilities

- Design, develop, and maintain automated test scripts using tools such as Selenium, Cypress, Playwright, or similar.
- Integrate automated tests into CI/CD pipelines (e.g., Jenkins, GitLab CI, Azure DevOps).
- Identify test cases for automation based on manual test scenarios or business requirements.
- Perform regression, functional, integration, and end-to-end testing for web and/or mobile applications.
- Participate in sprint planning, daily stand-ups, and reviews to ensure quality is considered at every stage of development.
- Collaborate with developers and product teams to understand application features and architecture to improve test coverage.
- Troubleshoot test failures and identify root causes to improve test stability and reliability.
- Contribute to test plan creation, test strategy, and quality metrics reporting.

Skills

- 1 to 3 years of experience as an Automation QA Engineer or similar role.
- Solid experience with one or more automation tools/frameworks (e.g., Selenium WebDriver, Cypress, Playwright, TestNG, JUnit, etc.).
- Proficiency in scripting or programming languages like Java, JavaScript, Python, or C#.
- Good understanding of software testing life cycle (STLC) and QA methodologies.
- Experience with version control systems (e.g., Git).
- Familiarity with REST API testing using Postman, Rest Assured, or similar tools.
- Knowledge of CI/CD tools and practices.
- Strong problem-solving skills and attention to detail.
- Effective communication and teamwork abilities.

Nice to Have

- Experience with mobile test automation (e.g., Appium).
- Knowledge of performance testing tools (e.g., JMeter, Gatling).
- Exposure to BDD frameworks like Cucumber or SpecFlow.
- Experience working in Agile/Scrum environments.

Job Benefits

- ☐ 5 Days Working
- ☐ Paid Leaves + Festival Leaves
- ☐ Referral Bonus Policy
- ☐ Annual Trip
- ☐ Training & Career Development programs
- ☐ Rewards & Recognition
- ☐ Fun-Loving Culture
- ☐ One-to-One Mentorship
